

NICOLÁS PATRICIO MORENO ÁVILA

Founding Engineer · Full-Stack & AI/ML · Interactive 3D & UX

Santiago, Chile · remote or on-site | Phone: +56 9 3728 7950 | Email: nicolaspatriciomorenoavila@gmail.com
GitHub: github.com/4mser | LinkedIn: linkedin.com/in/nicolás-moreno | Portfolio: nicolas-moreno.vercel.app

SUMMARY

Self-taught founding engineer with a physics-engineering background (3 yrs). I build products end to end — from backend and applied machine learning (ML) to high-end interactive and 3D web interfaces. Built **FIDELYA**, a multi-tenant SaaS customer-intelligence platform (**60+ modules, 8+ business tenants, 3,500+ users**), solo from zero and now lead its team of 6; led **GoAuto** to **51 dealerships** as Tech Lead. Core: full-stack (TypeScript, NestJS, Next.js), applied ML, and interaction/3D design.

EXPERIENCE

CEO & CTO, Co-founder, FIDELYA

Jan 2025 – Present · Santiago, Chile

- 60+ production modules on a multi-tenant SaaS platform (NestJS, per-tenant MongoDB, Next.js, real-time WebSockets); live with 8+ business tenants and 3,500+ registered users.
- Built the platform solo from zero — backend, frontend, infrastructure, and the full UX/UI and design system; now lead a team of 6.
- Built **AURA**, FIDELYA's AI engine for churn prediction and automated retention from real consumer behavior, powered by graph/tensor models and Graph Neural Networks (GNNs) from the in-house research lab (formerly Entropía Technologies).

Cofounder & CTO, B&N Solutions

Jul 2026 – Present · Santiago, Chile · technology studio

- Deliver custom software, AI automation, and high-end interactive and 3D web experiences for clients — custom Canvas/WebGL rendering engines, GSAP motion, and end-to-end UX.

Tech Lead & Full-Stack Engineer, GoAuto (Dropout Capital)

Oct 2025 – Jul 2026 · Remote · LATAM + US team

- Owned architecture and full-stack delivery of GoAuto, an AI-powered dealership-management platform running 51 auto dealerships across Chile.
- Led a 5+ engineer team across LATAM and the US, setting architecture and product direction.

Full-Stack & Machine Learning Developer, Physical AI Lab (Chile)

Mar 2024 – Sep 2024 · Remote · Robotics, AI & simulation firm (physicalailab.cl, formerly Scale AI & VascoLab)

- Built a Convolutional Neural Network (CNN) anomaly-detection system for SAESA (Chilean energy utility) to flag faults across electrical power-transmission lines; also shipped full-stack production features.

Freelance Full-Stack Developer, Independent

2022 – 2024 · Remote · Independent clients

- Delivered landing pages, web automations and small custom systems for independent clients, end to end — from requirements to deployment.

TECHNICAL SKILLS

LANGUAGES TypeScript, JavaScript, Python
FRONTEND Next.js, React, Tailwind CSS, Zustand, Progressive Web Apps (PWAs)
MOBILE React Native, Expo, cross-platform white-label apps, native theming
INTERACTIVE & 3D Canvas 2D/3D, WebGL, custom rendering engines, GSAP motion, data visualization, creative coding
BACKEND NestJS, Node.js, REST APIs, WebSockets, real-time systems
DATA & ARCHITECTURE MongoDB, SQL, graph databases, data modeling, multi-tenant SaaS, per-tenant data isolation
AI/ML & DATA SCIENCE applied ML, CNNs, computer vision, anomaly detection, GNNs, tensor/graph models, churn/retention, LLMs & AI agents, statistical & mathematical modeling
INFRASTRUCTURE AWS, Fly.io, Vercel, Railway, CI/CD
DESIGN Figma, UX/UI, design systems, prototyping

EDUCATION

Physics Engineering (incomplete, 3 yrs) — Universidad Andrés Bello, Santiago

2019 – 2022 · Foundations in data science and mathematical/statistical modeling.

Technical High School — Telecommunications

2014 – 2017 · Programming, networking, cybersecurity, fiber optics, electronics.

LANGUAGES

Spanish — Native · English — Professional working proficiency
Founder Institute Chile 2026 — selected.
